Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Garoni et al. (US Patent No. 5,482,472).

Garoni et al. disclose a rigid heart structure (col. 2, lines 37-38) defining at least one cardiac chamber; and an affixation surface is formed from a material that permits lead affixation; multiple affixation surfaces; the multiple affixation surfaces are coded to visually indicate a status (col. 2, lines 43-46).

Claims 1, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Yong (US Patent No. 6,234,804).

Yong disclose a rigid heart structure defining at least one cardiac chamber; and an affixation surface is formed from a material that permits lead affixation (col. 2, lines 39-42).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yong (US Patent No. 6,234,804) in view of Littmann et al. (US Patent No. 6,141,576).

Yong discloses the claimed invention except for a helical electrode from an implantable cardiac lead.

Littmann et al. teach a helical electrode (20) from an implantable cardiac lead (10).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a helical electrode from an implantable cardiac lead as taught by Littmann et al., since Yong states at col. 4, lines 26-28, that such a modification would permit actual simulation of procedures performed on the heart using existing surgical instruments.

Allowable Subject Matter

Claims 3-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
